

Food Safety and Quality Policy

Our Commitment

This policy applies to all Bega Cheese Limited (Bega) manufacturing sites as well as application of the same principles to third party manufacturers producing products on our behalf.

At Bega we are committed to supplying quality, safe and consistent products, authentic to design and compliant to legal requirements. Our commitment is to supply products that meet the expectations of our customers and consumers.

This will be achieved through:

- Compliance with regulatory obligations, including export legislation and the requirements of any importing country.
- The application of Good Manufacturing Practices and meeting the standards of our customers and consumers.
- A documented Food Safety Quality Management System, which provides the framework to assess and control current and emerging food safety and quality issues.
- Developing and maintaining appropriate management and supervisory controls over all activities in the design, production, and supply of products.
- Ensuring all employees are trained to the required level to ensure compliance with the standards and requirements of their role.
- Commitment to fostering culture that empowers all employees to take ownership of product quality and food safety.
- Establishment and monitoring of key programs in our Quality Strategy including Supplier Assurance (food fraud prevention), manufacturing (storage, production, processing, handling of product, testing and product release), distribution and Quality Key Performance Indicators (KPI).
- Evolving our systems in response to changing regulations, industry best practice and moving expectations of markets.
- Regularly reviewing this policy and its effectiveness.

Our Food Safety and Quality Policy applies to all aspects of the organisation's supply chain. A process of continuous review and improvement ensures the relevance of the Food Safety and Quality Management System.

Pete Findlay
Chief Executive Officer

creating great food for a better future
